ABOUT ME

With over 6 years of experience as a Full Stack and Web Application Developer, I have worked on web applications across industries like e-commerce, insurance, and digital remittance. I love solving challenges and creating user-friendly, high-performing applications - it makes me happy to build things that work well. My expertise includes **JavaScript**, **React**, **Vue**, **C# .NET**, **SQL Server**, **Azure**, and other technologies. I try to create solutions that help businesses grow and run more smoothly, while always learning new things and striving to improve my skills.

EDUCATION AND TRAINING

[08/2020 – 05/2022]   ### Degree Programme in Information Technology

South-Eastern Finland University of Applied Sciences (XAMK)   https://www.xamk.fi

Address: Patteristonkatu 3 D, 50101, Mikkeli |

[11/2009 – 02/2014]   ### Bachelor in computer Engineering

Khwopa Engineering College, Purbanchal University   https://khwopa.edu.np/

Address: Libali, Bhaktapur - 8, 44800, Bhaktapur, Nepal |

WORK EXPERIENCE

[11/2022 – 02/2025]   ### Web application developer

Frosmo

City: Helsinki | **Country:** Finland

As a Web Application Developer, I specialize in creating UI templates for e-commerce and iGaming sites, displaying personalized product recommendations and custom search functionalities using data collected through the Frosmo library.

I primarily work with JavaScript to build dynamic, user-friendly experiences for recommendations and also with React and TypeScript, briefly, to build custom search pages. Additionally, I implement other web functionalities based on customer requests, ensuring seamless integration and optimized user engagement across platforms.

[05/2022 – 08/2022]   ### Production Specialist - Repair

Swappie

City: Helsinki | **Country:** Finland

At Swappie, I repaired a wide range of iPhone issues, including screen replacements, battery changes, and other hardware-related faults, ensuring devices were fully functional for resale.

[08/2021 – 01/2022]   ### Business Developer (Full-stack Developer)

Shadow Finland

City: Helsinki | **Country:** Finland

I worked as a Full Stack Developer to design and build a web application for online food ordering, shadowfoods.com (Not available online anymore). The platform allows users to browse menus, customize orders, and make secure payments online. It is integrated with VivaWallet for seamless payment processing and Deliverect for efficient menu management and order synchronization with restaurants.

I was responsible for the entire development process, from planning the system architecture to deployment.

My tasks included:

- Full stack development using .NET 5 Framework, jQuery, Bootstrap, C#, and MS SQL to create a responsive and user-friendly interface.
- Implementing secure payment integration with VivaWallet.
- Integrating Deliverect for real-time menu updates and order management.
- Order synchronization with restaurants.
- Deploying and maintaining the application on Azure.

[03/2020 – 02/2021] **Software developer**

EightSquare Infotrans

City: Kathmandu | **Country:** Nepal

I worked as a Full Stack Developer for an online money transfer application serving Malaysia (eremit.com.my) and Singapore (eremit.sg).

My responsibilities included developing APIs for mobile applications and handling administration operations and configurations. I worked with Vue.js, Web API with .NET Framework, and SQL Server to build and enhance the application's functionality.

[01/2019 – 02/2020] **Software developer**

Arhant Solutions

City: Kathmandu | **Country:** Nepal

At Arhant Solutions, I contributed to the development of IEnsure, a web application built using the .NET Framework in Webforms and SQL Server, tailored for the insurance industry. The platform is primarily utilized by insurance agents for creating and managing policies efficiently.

My role involved adding new policy types with different functionalities, creating and analyse the reports using the complex SQL queries fixing old bugs and updating the UI of the application. I also developed a chat system for internal staff using SignalR, improving communication within the application.

[03/2018 – 01/2019] **Software developer**

Channakya Software

City: Kathmandu | **Country:** Nepal

As a Software Developer, I develop and update web applications using .NET technologies, including ASP.NET, MVC, SQL Server, and Entity Framework. I have experience working on web applications for a DTH service provider, ensuring robust and scalable solutions to meet client requirements. Additionally, I briefly worked with VB.NET on a financial software project for small cooperatives.

[10/2016 – 02/2018] **Web developer**

Social IT World

City: Kathmandu | **Country:** Nepal

I started my full stack development journey with Social IT. The main responsibilities include design, develop and modify web applications developed in .NET Core MVC platform.

- Tech-stacks used: C#, javascript with .NET Core MVC framework and Sql Server.
